VINEYARDS

The vineyards are located in the area around the towns of Limassol and Paphos, in Cyprus and are situated at an elevation of 700 meters.

SOIL

Limestone, clay, lithosol.

CLIMATE

Cyprus has one of the warmest climates in the Mediterranean, with the average annual temperature on the coast being around 24C in the day and 14C at night. Milder but still relatively warm (8-18C) winters follow heated, balmy summers in Limassol. These reliable and predictable year round conditions allows for successful cultivation of most grape varieties.

HARVEST

No information.

VINIFICATION METHOD

Matures at low temperatures in specially designed vessels.

SERVING SUGGESTIONS

Pairs perfectly with pasta dishes, chicken, fish, and sweets such as baklava.

TASTING CHARACTERISTICS:

Delicate aromas of freshly cut hay and stone fruit

Dry and crisp
