## VINEYARDS

Organic certified vineyards in the Koropi area of Attica, Greece where the Vassiliou family have produced fine wines since 1905.

## SOIL

Sand and clay.

## CLIMATE

Dry, hot summers with mild winters..

## HARVEST

2nd - 3rd week of September..

## VINIFICATION

The grapes are hand picked and carried to the winery in small latticed baskets. Pure white vinification follows with fermentation in stainless steel tanks at 18-20C. The addition of a small quantity of pine resin to the must during fermentation offers a unique taste. 500gr resin per tonne is added. The fermentation dissolves the resin and gives the wine a characteristic flavor.

## SERVING SUGGESTIONS

Pairs well with traditional Greek dishes, seafood, fish, salads and Japanese cuisine.

## TASTING CHARACTERISTICS:

Unique aroma of resin combined with the rich bouquet of Savatiano
